Introduction

Research, Innovation & Impact (RII) supports all levels of staged research development through Research Development Grants. Research Development Grants are intended to provide a pathway to success for research and scholarship with the goal of accelerating project competitiveness prior to extramural proposal submission. Applicants should use these grants to develop research, scholarly, or creative activity in preparation for extramural funding, and should prioritize submission to the single most relevant Research Development Grant competition in a given funding cycle.

Research Development Grants should support multiple of the following initiatives or concepts:

1. Implementation of the UArizona Strategic Plan or UAHS Strategic Plan with a focus on Pillar 2: Grand Challenges (although well-developed research opportunities that support the other Pillars are welcome)
2. Advancement of graduate and particularly undergraduate research opportunities (inclusion of undergraduates in research are prioritized)
3. Advancement of TRIF Initiative priority areas (see section A.2)
4. Inclusion and promotion of justice, equity, diversity, and inclusion (JEDI) in research

Research Development Grants are not intended to provide bridge funding, rather to launch a new research program of inquiry. If you are interested in or require bridge funding, please consult first with your department head. All Research Development Grant awards are dependent upon review and availability of funds. Failure to meet the Award or Reporting expectations described below results in ineligibility for receipt of subsequent funding from RII.

This Proposal Preparation Guide (PPG) provides information and guidance on the full lifecycle of Research Development Grants. If an individual solicitation differs from the PPG, the guidelines provided in the solicitation (available on the Research website) supersede those of the PPG.

A. Proposal Preparation

All documents must have 1” margins, and no smaller than 11 pt. font. The following are acceptable fonts: Arial, Times New Roman, Calibri, or Tahoma. Reduced font sizes in figures and legends are acceptable although font sizes should be legible.

Reducing margins or font size will result in administrative return without review. If a proposal is returned without review, the PI must wait until the next funding cycle to resubmit.

All documents, except the budget sheet, must be saved and uploaded as PDF files. Please avoid uploading any PDFs as Adobe Portfolios, these do not work for InfoReady export. The budget sheet should be uploaded as an editable Excel document.

1. Full Proposal

Each of the Research Development Grants require the following sections: Cover Sheet, Proposal Narrative, and Required Supplemental Documents. As a reminder, should there be deviances between the PPG and the solicitation on the Research website, the Research website supersedes this PPG.

Full Proposal Sections (including step-by-step upload into the submission system):
a) **Cover Sheet:** The following information will be copied into text boxes within the system. Special characters are discouraged.
   i) *Principal Investigator:* Name, Department, College, Rank, Contact Information
   ii) *Co-Investigators (up to four Co-Is may be listed):* Name, Department, College, Rank, Contact Information
   iii) *Business Officer, Research Administrator, or Similar:* Name and Contact Information
   iv) *Proposal Summary:* Include a 200-word summary of your proposal. A self-contained description of the proposed work and outcomes that would result if funded. Include the significance and potential impacts of the proposed work. This should be understandable to a scientifically or technically literate lay reader.
   v) *Proposed Extramural Mechanism:* 200-word limit. Include the targeted solicitation (including funding level and deadline) and/or sponsor. If you do not have a solicitation, discuss fit to the potential sponsor.
   vi) *Keywords/Key phrases:* Include up to five keywords or key phrases.
   vii) *Proposal Specific Sections:*
       (1) Select a Track, if applicable
       (2) Identification of relevant compliance areas including human subjects, animal research, inclusion of Native Americans or international indigenous groups in the proposal, etc.
       (3) Budget amount requested (round up to the nearest dollar)
       (4) Identification of primary TRIF initiative (see below for details) or select “none”
       (5) Identification of Co-Reviewed TRIF initiative
       (6) Review Panel Selection (select primary and secondary, if applicable): Clinical, Life, and Biomedical Sciences; Physical, Data, and Earth Sciences; Engineering, Space, and Optical Sciences; Social Sciences and Humanities; Arts

b) **Proposal Narrative:** The proposal narrative is limited to two-pages. The narrative should include the following sections:
   i) Brief description of the specific aims or objectives
   ii) Significance; expected outcomes; and relationship to priority areas 1 through 4 (as applicable) from the Introduction.
   iii) Approach
   iv) Brief description as to why the PI and/or team is uniquely positioned to be competitive and how the RII grant will increase competitiveness

c) **Required Supplemental Documents**
   i) References cited (no more than one-page) using the discipline-specific reference standard, i.e., the reference style you would use when submitting a journal article in your field
   ii) PI’s CV or agency-specific biographical sketch
      (1) NIH biographical sketches are exempt from the 1” margin requirements as detailed above and may be a maximum of five-pages per NIH guidance
      (2) CVs should be no longer than two-pages
   iii) Budget and budget justification using the budget template provided in the submission software
   iv) Confirmation from the appropriate research administrator that your budget has been reviewed and is correct at the time of submission. “The appropriate research administrator” is the individual that would normally approve and route your budget to Sponsored Projects & Contracting Services for submission to the external sponsor. For this confirmation, an email PDF is acceptable if the email includes the total dollar amount requested.

d) **Supplemental Documents, if Applicable**
1. Up to four Co-I(s) CV(s) or agency-specific biographical sketch(es), proposal formatting and limitations described above in PI CV section apply.

2. Letters of Collaboration (from unfunded research collaborators, including all international collaborators).

3. Letters of Support, including in-kind support or match, i.e., letters committing financial resources.
   a) Dean’s, Department Head, or Director’s letters are only required if there is some form of institutional commitment associated with the proposal. Commitment is defined as resources that would otherwise not be available to you, e.g., additional funds for travel, in-kind support from existing personnel, etc.
   b) If there is a collaborating institution, a letter of support indicating the institutional commitment of the collaborating institution must be provided. That is, collaborating institutions must provide support for their faculty, this letter should document that support (see Budget Preparation section for additional information on allowable costs).

4. Resubmission Statement: If your Research Development Grant proposal requests funds to enhance the competitiveness of a recently declined extramural proposal, include a one-page (maximum) description of how you plan to address the reviewer comments. Attach this statement to the reviewer comments (e.g., NIH Summary Statement or NSF Panel Summary) and upload as one PDF document.

5. If you have an existing protocol, upload a PDF of your current approval letter only (not the full protocol) related to human subjects or animal research. Any items proposed in the grant that do not fall under the approval will be submitted as an amendment upon award recommendation. Note that all funded proposals are expected to comply with applicable institutional research policies, including but not limited to, human subjects, animal research, conflict of interest, HIPAA, export control, and laboratory safety.

The following document templates are provided:
- Budget Form – Microsoft Excel
- Proposal Narrative – Microsoft Word

2. TRIF Initiative Alignment

   In November 2000, Arizona voters made a 20-year commitment to stimulate innovation and research and to support Arizona’s knowledge-based economy. The landmark passage of Proposition 301, a 0.6% sales tax to be used for education in Arizona, included a new University-directed funding source, the Technology and Research Initiative Fund (TRIF), which has been used to catalyze research and technology transfer at Arizona’s academic institutions. Additionally, TRIF seeks to expand access to baccalaureate or post baccalaureate education. 2021 marked the start of a reauthorized TRIF cycle. At this time, the TRIF cycle is annual and as such, proposals funded under the TRIF initiative must be completed by June 30, 2023.

   If the proposal aligns with a TRIF initiative, applicants must select the most applicable initiative during proposal submission. If proposals align with two TRIF initiatives, applicants will have the option to select two initiatives. TRIF initiative options include:
   1. Improving Health
   2. Water, Environmental, and Energy Solutions
   3. National Security Systems
4. Space Exploration and Optical Sciences
5. Access and Workforce Development
6. Innovative Tech for the 4th Industrial Revolution

For the most recent Arizona Board of Regents (ABOR) TRIF Annual Report visit the [ABOR site](#).

**B. Budget Preparation**

Research Development Grants are intended for UA-related research expenditures. Awards may not be used to replace current sources of support for personnel. **No Research Development Grant funds may be used for salaries for personnel from other institutions.**

If there is a collaborating institution, the proposal must indicate, through letters of support (i.e., institutional commitment), a summary of the commitments that the collaborating institution is making toward the proposed effort.

The following provides a list of generally allowable costs:

- Short-term hourly student wages and associated ERE
- Research technical staff, including graduate students, and associated ERE and tuition and fees (when applicable)
- Honoraria or participant stipends
- Meeting costs, e.g., room rentals, meals/breaks, etc.
- Supplies, including research supplies and/or items such as musical scores and art supplies
- Domestic travel (international travel funding is only available in very well justified cases or as part of the International Research Grant program)
- Specialized equipment (capital and other) pertaining specifically to the project
- Proposal support e.g., graphic design, speaking coaches (for site visits), etc. above and beyond what is currently offered by RII
- Consultants may be used in very limited, exceptional, and well-justified cases.
- Extremely well-justified release for faculty with a greater than 2:2 teaching load OR faculty pursuing large/complex research efforts (this requires a letter of support from your department head and should be used judiciously). Please note that we cannot utilize TRIF funds for teaching release, as such releases are provided through alternative funding sources. Hence the criteria for extremely well-justified cases.

In addition to direct cost items mentioned above, RII Core Facilities use credits may be requested.

RII may request that proposal budgets are revised prior to award. This includes potential revisions to the total award amount. Generally, if a budget amount is reduced a reduction in scope will also occur.

In general, Research Development Grants should not be used to supplement existing faculty start-up. Applicants with significant start up may apply in very well justified cases and must explain how access to Research Development Grants will enable new, interdisciplinary discovery or a proposal with significant return on investment.
C. Eligibility

Each of the Research Development Grants are open to University of Arizona eligible Principal Investigators/Project Directors/Co-Principal Investigators (hereafter called “PI designation”). For more information on whether you meet the PI designation, please visit the Research site. Please note that in general, Research Development Grants are designed for Tenured/Tenure Eligible Faculty; Continuing/Continuing Eligible; Career Track; and Research Scientists (only these four categories of eligible investigators can apply for TRIF funds).

Postdoctoral Fellows are advised to seek funding through the Postdoctoral Research & Development Grants sponsored by the Office of Postdoctoral Affairs.

For Research Development Grants promoting interdisciplinary and transdisciplinary research, successful applicants will include PI/Co-PI teams from multiple departments and generally, multiple colleges.

The purpose of these awards is to encourage developing research projects for extramural grant funding. As such, applicants are only eligible to receive one award per cycle as PI and one award per cycle as Co-I. Choose judiciously and prioritize submission to the most applicable competition for a given funding need. Prospective Applicants who have not fulfilled Final Progress Report and Review Service Commitments (per the RII Project Funding Agreement) are at a competitive disadvantage until these requirements are complete.

D. Proposal Submission

Proposals must be submitted through UA Competition Space by 5:00 pm no later than the deadlines listed on the solicitation page.

*It is strongly suggested that applicants complete and submit their application much earlier than 5:00 pm as the system will not accept applications after the deadline. There have been instances of application failure when submitting minutes prior to the 5:00 pm deadline. To ensure successful submission, RII recommends submitting your proposal no later than noon on the deadline date.*

Applications that do not meet the submission deadline will not be accepted. There are no exceptions, please plan accordingly.

Proposals must be linked to the PI’s name and official UA email address. PIs may designate an individual, such as a research administrator, to proxy in the proposal materials. Information on submitting proposals by proxy is available in the “Help” section of the submission website. Please do not simply have the proxy submit in your name. Instead, follow the steps to give proxy. Failure to do so can cause UA Competition Space to not accept your submission. If you have questions, email resdev@arizona.edu.

RII Research Development Grants do not require UAccess Research routing or UA Sponsorred Projects & Contracting Services approval prior to submission. However, all proposals require documentation from the appropriate research administrator (see A.1.c.v).

E. Proposal Processing & Review

Proposers should allow up to three months for proposal processing, review, and notification.
Submitted proposals will first undergo a compliance check that includes confirmation of all required
documents, page-limit and formatting compliance, and confirmation that the budget is allowable and
within the amount specified for the solicitation. Once the proposal is reviewed as compliant it enters
merit review. At this stage, applicants will only be notified if their proposal will be returned without
review.

Review is conducted by UA Research faculty and qualified staff. PIs should write proposals that are jargon-
free and understandable to an interdisciplinary audience. The following criteria will be considered:

- **Overall Impact & Significance:** Evidence of the project to address identified gaps in
  knowledge, initiate new research or scholarly activity, and how the project will explore
  novel, creative, or potentially transformative concepts
- **Fit to FY Research Priorities:** see the Introduction, items 1-4
- **Budget & Return on Investment:** Fit and reasonableness of the budget to the scope as well
  as the feasibility of the plan to pursue external funding and the likelihood of a competitive
  proposal
- **Investigator/Research Team:** Qualifications and expertise of the investigator or research
  team to conduct the proposed research, creative, or scholarly activity. If applicable, the
  history of successful collaborations by the proposing team

Selection will be based first on the outcome of the merit review, including alignment with institutional
priorities. Where applicable, alignment of proposals with UA’s TRIF plan will be considered.

**Conflict of Interest (COI) and Confidentiality:** All information contained in a grant application and
associated supplemental documents are considered highly confidential and all efforts will be made to
ensure the fair, objective, and confidential review of each proposal. Reviewers will be required to sign a
COI statement prior to proposal assignment and review and to adhere to strict guidelines to ensure the
confidentiality of the content of all grant applications as well as any information conferred during the
ensuing panel discussions. Generally, any prior collaborations, mentorship roles, and/or departmental,
financial, and familial conflicts are considered COIs. During panel discussion, conflicted reviewers will be
recused and released during the dialogue regarding the proposal with which s/he has an apparent or
perceived COI.

**F. Award & Post-Award Processes**

The PIs of all proposals, whether awarded or declined, will receive a notification. Award notification will
be sent to PIs, heads/directors, deans, and business offices. Reviewer comments will be sent only to the
PI (or designated proxy in the system). After funding decisions have been made (approximately three
months after the submission deadline) note that it can often take up to one week to send all
notifications.

Once notifications are sent, PIs and their business offices will receive a Project Funding Agreement from
the appropriate business administrator (see section H. below). This initiates the account setup and
transfer of funds.

Upon award, the PI must comply with all applicable institutional research policies, including but not
limited to, those related to research with human subjects, animal research, conflict of interest, HIPAA,
export control, and laboratory safety.
RII Research Development Grant awards must be leveraged to acquire external support for the proposed research or scholarly activity. It is expected that recipients:

- Prepare at least one proposal for an external grant during the award period, and
- Serve as a reviewer on at least two RII competitions over a three-year period.

**Awards span the 2023 fiscal year, July 31, 2022, through June 30, 2023.** Workshop grants have a nine-month award cycle, equipment grants must be expended in the Fiscal Year in which they are awarded. Multi-year projects are unavailable.

While RII recognizes that the original project scope may change, **in general, no-cost extensions are not permitted.** If, under extenuating circumstances, a no-cost extension is required, the PI must provide sufficient documentation justifying the request. A request merely for the purpose of using unliquidated balances is not considered sufficient justification. Changes to the budget must be well justified; contact the appropriate budget administrator (listed below) for additional information.

### G. Reporting

Failure to meet the Award or Reporting expectations described here results in ineligibility for receipt of subsequent funding from RII.

Final reports are due within one month of the award’s end date. PIs must submit final reports via UA Competition Space. Final reports are submitted via textbox, and therefore, special characters are discouraged. If you require the use of special characters, please contact us. Multi-year projects are required to submit annual progress reports with similar information. Reporting requirements include the following:

- **Start & End Dates of Funding**
- **Project Title**
- **Outcomes:** 750 words. A statement on the research findings, creative or scholarly activity completed.
- **List of Submitted Proposals:** 500 words. Include the following information: proposal title, funder, program name, solicitation number, UAccess Research document number (if applicable), requested amount, and status. If you have not completed a proposal, enter “N/A” and you must complete the Proposal Development Plan section.
- **Proposal Development Plan** (applicable only if you have entered “N/A” above): 500 words. If you have not submitted a proposal, enter proposal development plan including targets and dates.
- **Partnerships & Collaborations Developed:** 500 words. Describe the new partnerships that have been developed due to this funding. These may include new research/scholarly partnerships, institutional collaborations, etc.
- **Changes or Problems:** 500 words. Describe any changes to your initial plan, including any problems that you encountered, and how you addressed these issues.
- **Products or Publications** (Completed or In Progress): 1000 words. Products include journals or juried conference papers, books, book chapters, other conference presentations/papers, other publications, technologies or techniques, patents, inventions, licenses, websites, other products.

Reports will be shared with RII leadership and Communications. RII Communications may opt to publicize the findings of an RII funded award. Prior to any publicity RII Communications will contact the PI for additional information.
Investigators may credit the University of Arizona Research Development Grant program with the year of award in applicable products.

Financial reporting and account close-out are coordinated by the appropriate Post-Award administrator (see Section H.) and the investigator’s unit business administrator.
